# ASP ASPIRE & CINA Nail Art creates a New "We Love Acrylics nail style"! *That your clients are sure to love too!*

Valencia, CA – December 1, 2011

Create enhancements that are creative and strong! Nanotechnology inspires A.S.P. Aspires Acrylic Powder and Liquid line. Nanotechnology is the science of shrinking down molecules to a smaller level to create a tighter bond to the nail and a cleaner, clearer nail. The self-leveling formula requires little to no filing! ASP Aspires Acrylic Powder is becoming one of the hottest new powder and liquid formulas for the professional nail technician.

This professional formula is one of the key ingredients to creating a masterpiece. Incorporating media into nails creates a unique sleek way to show off your client's love for a professional salon set of nails. The clear or white powder can also allow pure raw pigments to be mixed in the powder to create an ultra bright set of acrylic enhancements, 3-d nail art or as a base to polish over. Create the "We Love Acrylics style" with a little added benefit of nail art from the Cina Nail Art line. Using Cina's Punky Princess and Palace Posh is a great way to create a Valentines work of art right at your clients' fingertips!

The ease of this formula creates an easy workability so no air is trapped between layers when building the nail, so leave the bubbles in the bathtub where they belong. The ASP Aspire Powder and liquid is guaranteed non-yellowing formula so your nail appearance stays healthy and clean. Reap the benefits of this inspirational and creative acrylic powder by going to your local Sally's Beauty Supply for your very own today. Or log on line at [www.aspnail.com](http://www.aspnail.com) for more great ideas and inspirations!
